

## Biology Field Operations

### TEAMS Biological Field Operations and You: A Winning Combination

TEAMS Biological Field Operations provide temporary staffing solutions to accomplish your resource survey goals. Our specialists are highly-skilled, independent, and ready to assist with your survey, monitoring, and data management needs. We offer expertise in the following areas:

#### Biological Field Surveys and Monitoring

- Threatened, Endangered, and Sensitive Plant Surveys
- Survey and Manage Program Surveys
- Invasive Plant Surveys
- Range Monitoring
- Wildlife Surveys

#### Natural Resource Information Systems Data Entry

- Plant Survey and Element Occurrence
- Watershed Improvement Tracking
- Invasive Species
- Wildlife

TEAMS provides quality, professional services and we guarantee our work. If you need biological field services, contact us for a free consultation.
